OUTDOOR FIRE PITS AND FIREPLACES

A fireplace transforms your outdoor living space — extending the season and giving every evening a reason to linger.

The Carol Rose Coastal Collection offers a full range of outdoor hearth products: traditional fireplaces, linear fireplaces, fire pits, and open fireboxes. Build your ideal system with a classic Wildwood log set and burner, or go clean and contemporary with a linear burner. Whatever your style, there's a Carol Rose fireplace that fits.

Every product in the collection is built with stainless steel exterior surfaces — engineered to hold up and look great through years of outdoor exposure.

Carol Rose

The Carol Rose Coastal Collection is named for Carol Rose Burtz, a customer service manager who joined Empire in 1959. She's the first Empire employee to have a product line bear her name — a fitting tribute to an exceptional career.

fire pits

OUTDOOR FIRE PITS

A large linear fire pit creates an instant, roaring fire — bringing light and warmth to any outdoor gathering. Available in 48-inch and 60-inch sizes, each features a precisely ported stainless steel burner concealed beneath a bed of crushed glass for a consistent, even flame across the full length of the pit.

Accessories include a drain tray, four-sided tempered glass wind deflector, and a stainless steel weather cover that installs with or without the wind deflector in place. A built-in sensor continuously monitors the flame and shuts off the gas if high wind or rain extinguishes the fire. Relight in seconds and get back to the evening.

inspiration

INSPIRATION IN COLOR

Even with no fire burning, the built-in LED lighting system keeps the ambiance going — illuminating the crushed glass bed in your choice of color and intensity. Two program settings cycle through colors automatically. For locations where power isn't readily available, base model fire pits are available without lighting.

reliable

RELIABLE FOR PATIO, POOL, OR SEASIDE

With all visible surfaces made from 11-gauge marine-grade 316 stainless steel, our fire pits are built to withstand exposure to harsh environments. Rainwater flows through the fire pit onto the ground or into the available drain tray, which routes the water away. Both the valve and lighting system are designed for years of outdoor use.

Linear

OUTDOOR LINEAR FIREPLACES

Stainless steel construction, an integrated LED lighting system, and a dramatic, wall-to-wall flame make Carol Rose outdoor linear fireplaces a stunning centerpiece for any patio or outdoor living space.

Choose from three sizes: the 48-inch with a full, commanding flame, the 60-inch for a wider, more expansive look, or the 72-inch for a truly spectacular fire that anchors even the largest outdoor spaces.

All models conceal the gas burner beneath a bed of clear-frost crushed glass (required; sold separately). An optional black glass reflective liner adds depth and dimension to the flame pattern, creating a richer, more dramatic fire. A glass deflector shield protects the flame from wind, with optional taller deflectors available for windier locations.

Controls are tucked beneath a tilt-up cover — including pushbutton ignition, flame adjustment, and the LED lighting system with seven color options and adjustable intensity. Single-sided and see-through configurations are available in all three sizes.

traditional

OUTDOOR TRADITIONAL FIREPLACES

This traditional fireplace features an all-stainless exterior with a deep, natural-looking flame powered by a stainless steel version of our popular Harmony burner. The refractory liner and Wildwood Log Set give the fire a natural, substantial look that complements the all-stainless exterior.

Both the 36-inch and 42-inch models deliver the same deep, full flame, with the valve and controls concealed beneath the fireplace floor for a clean look.

fireboxes

OUTDOOR FIREBOXES & BURNERS

The outdoor firebox gives you a certified, weather-ready foundation to build around — finish it your way. Built with the same rugged stainless steel construction as our fireplaces, it's a ventless design certified for use with any Carol Rose outdoor burner.

An optional stainless steel drain pan helps manage moisture beneath the fireplace. Weather doors are also available to protect the firebox when not in use.

traditional

TRADITIONAL BURNER & WILDWOOD REFRACTORY LOG SET

Spend more time with guests, less time managing a fire. Carol Rose outdoor burners convert any existing outdoor fireplace into a convenient gas system.

The Wildwood Refractory Log Set is designed specifically for outdoor use with our Harmony Stainless Steel Burner. Available in 24-inch and 30-inch sizes, both deliver a deep, full flame that complements the substantial concrete log sets. Internal baffles induce natural movement in the flames for a remarkably realistic fire.

Designed for installation in an outdoor fireplace or firebox only.
