On/off remote control

Custom hoods available

## Features

Finish right to the glass edge with a combustible facing such as wood or drywall

Commercial grade control panel

Glass diameter and height is fully customizable to suit your project needs

Lowest glass temperatures in the industry with our patented COOL-Pack technology

Power venting to 500 feet with custom termination options available

CSA Certified in Montigo's on-site lab

# E FOR ANY SPACE

## Customizations

Capable for outdoor installations

Available as an open unit (no glass)

Intake location can be: bottom or top

Power vent options include: Roof mount, wall mount, flush wall mount, or inline

Custom sizes are available

## 1976: The Days Before Gas Fireplaces

In 1976, Montigo president and founder, Dan Binzer, started installing zero-clearance wood burning fireplaces for local builders in Vancouver, BC. Over the years, demand grew for a gas alternative, and Dan engineered and manufactured the first ever sandpan logset. The logset was installed in a zero-clearance wood burning fireplace hell, resulting in one of the first zero-clearance gas fireplaces on the market.

## 1985: Gas Fireplace Manufacturing Begins

Demand for gas grew rapidly, especially among multi-unit developments so Dan Binzer started a company called Canadian Heating that would offer full service design, engineering and manufacturing for gas fireplaces. Under the Montigo brand, Canadian Heating began manufacturing and selling a wide selection of zero-clearance gas fireplaces throughout Canada and in 1985 development began for the latest and greatest in gas fireplace technology – direct venting.

## 1994: Manufacturing Excellence is Achieved

Development and advancement of the gas fireplace continued over the years with continual developments to improve the efficiency of the fireplaces and perfected manufacturing processes to deliver an optimum fireplace each and every time – even for completely custom units.

## Present: Leading the Way with Modern Fireplace Design

As one of the first to bring a linear designed fireplace to market, Montigo now offers the largest selection of linear fireplaces demanded by designers, architects and homeowners wanting to create a modern and contemporary space and homeowners wanting to create a modern and contemporary space.

### WARNING

Some materials used in the manufacturing process of this product can expose you to Benzene which is known in the State of California to cause cancer and birth defects or other reproductive harm. For more information go to [www.P65warnings.ca.gov](http://www.P65warnings.ca.gov)

## The essential element...fire creates energy

For over 40 years Montigo has been building linear and traditional fireplaces for designers of unique and glamorous public spaces.

The goal of the Montigo custom fireplace team is to work with architects, designers and their clients to incorporate an exclusive element of flame that dances and enhances your favorite space. With design parameters that have virtually no boundaries – if you can dream it, we can build it.
